

### **AMENDMENTS TO THE SPECIFICATION**

Please amend the specification as indicated. Added text is underlined, and deleted text is shown by strike-through or by double brackets where strike-through cannot be easily perceived.

**Please insert the following paragraph at page 8, line 15, after the paragraph containing the Brief Description of FIG. 9, and before the Detailed Description of the Preferred Embodiments.**

FIG. 10 illustrates another data structure in accordance with the invention.

**Please replace the first full paragraph on page 9 (page 9, lines 6-27) with the following paragraph.**

The implantable pulse generator 12 provides a series of electrical pulses to the stomach S. The implantable pulse generator 12 may be surgically implanted subcutaneously in the abdominal wall. The electrodes 16 may be installed in contact with the tissue of the stomach. Electrodes may be positioned on the outer surface of the stomach, implanted within the stomach wall, or positioned on the inner surface of the stomach wall. For example, the electrodes may be attached to the tissue by an electrocatheter as described in U.S. Patent No. 5,423,872 to Cigaina patent 5,423,872, incorporated by reference above. Alternatively, the electrodes may be as described in copending U.S. Application PCT/US98/1042 filed on May 21, 1998, and copending application 09/122,832, filed July 27, 1998, both of which are incorporated by reference in their entirety herein. As yet another alternative, electrodes may be substantially as described in U.S. Patent No. 6,606,523 to Jenkins, and U.S. Patent No. 6,542,776 to Gordon et al., concurrently filed application no. \_\_\_\_/\_\_\_\_ (Docket 3581/05) and application no. \_\_\_\_/\_\_\_\_ (Docket 3581/06), both of which are incorporated by reference in their entirety herein.
